10/9/2026 08:46

Dear Clerk and Members of Euxton Parish Council,

I am writing on behalf of Euxton Villa U7 Reds to apply for a grant of £750 towards age-appropriate football equipment for our young players.

My name is Mr Kieran McLoughlin and I am a volunteer coach with Euxton Villa U7 Reds. Euxton Villa FC is a registered charity based at the Jim Fowler Memorial Ground, Runshaw Hall Lane, Euxton.

Our immediate priority is to purchase a pair of good-quality portable/folding 12ft x 6ft mini-soccer goals complete with nets. This is the appropriate goal size for U7/U8 5v5 football and would give us equipment that directly matches the format our players are learning and competing in.

At this age, our coaching is development-led. Sessions focus on first touch, passing and receiving, finishing, goalkeeper development, movement, decision-making, teamwork and confidence. Suitable goals allow us to create realistic small-sided practices and game-related exercises rather than relying on cones or improvised targets.

The goals would be a durable, reusable investment rather than a one-off activity. They would be used throughout the season and provide a better-quality training environment for the children as they develop through mini-soccer.

PROJECT COST The approximate total cost of a suitable pair of folding 12ft x 6ft goals with nets is £750. **AMOUNT REQUESTED FROM EUXTON PARISH COUNCIL** £750.

OTHER PROJECT FUNDS

No other funding is currently confirmed or ring-fenced for these goals. If the final purchase price exceeds the grant awarded, any shortfall and ancillary costs would be met through team fundraising, sponsorship or other non-duplicating funding sources.

No purchase has been made and no funds have been committed in advance of a funding decision.

We believe this is a modest investment with a lasting benefit to young children participating in organised grassroots sport within Euxton. Our aim is to provide a positive, structured and enjoyable environment where children can develop football skills, confidence, teamwork, physical literacy and a long-term enjoyment of being active.

I would be very happy to attend the Parish Council meeting at which the application is considered to explain the project and answer any questions.

Thank you for considering our application.

Kind regards,

Mr Kieran McLoughlin

Coach – Euxton Villa U7 Reds

Mobile: 07926 258836

Email: Euxtonvillareds.2026@outlook.com

Hi Debra,

Yes, the purchase would include VAT. We have identified the FORZA Alu60 12ft x 6ft folding mini-soccer goals, supplied by Net World Sports, which are suitable for U7/U8 5v5 football and include nets.

The current price is £369.99 per goal, so two would be £739.98 before any delivery charge. The supplier is UK VAT registered, so if the Parish Council preferred to purchase the goals directly and donate them to the team, that would be absolutely fine from our side.

Product: FORZA Alu60 12ft x 6ft Football Goal

Supplier: Net World Sports / FORZA

Link: <https://www.forza.com/uk/forza-alu60-12x6-football-goal>

If useful, I can also obtain a formal quotation showing the VAT breakdown and delivery cost for the Council.

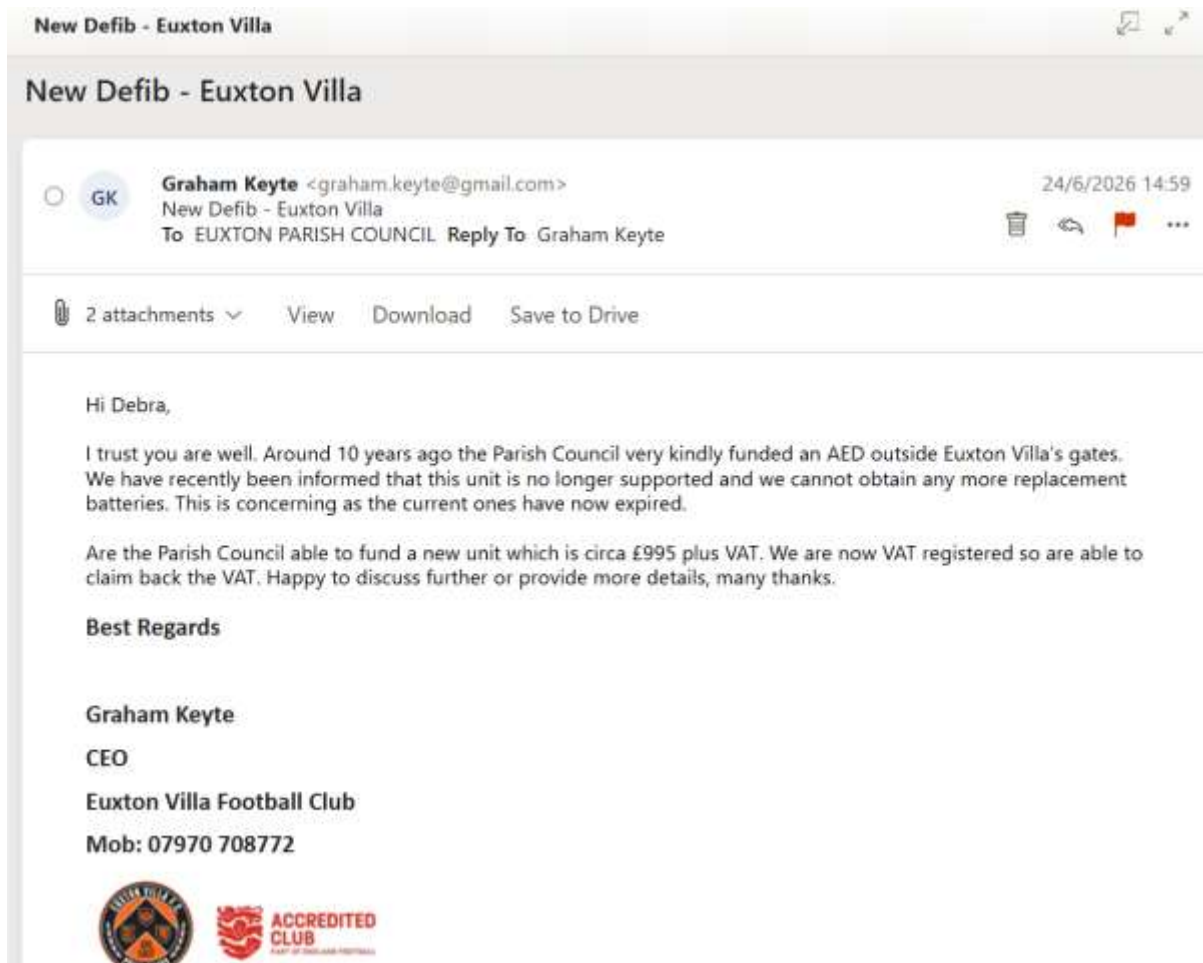

You are also very welcome to have a look at our team Instagram page to see the lads, our training and what we are building with the U7 Reds:

Instagram: @euxtonvilla_est2026

Thanks again for looking into this for us.

Kind regards,

Kieran McLoughlin

July 2016 EPC granted Euxton Villa £4000 towards your system - the Club chose the equipment that it placed on site.

Festive Lights – Charnock Richard

ConnectPro system, no twinkling, but we do have the static strings available at £21.99 ex vat per 10m section. I have also noticed a slight oversight on the previous prices provided as I didn't apply your discount. I will include the updated priced below with the total now coming down to £255.91 ex vat.

Support <support@festive-lights.com>
Re: we need a recommendation for what we should put on our outdoor christmas tree
To: chris@leiston-pc.gov.uk Reply To: Support 18/01/2026 15:57

Hi Debra,

Thank you for getting back in touch. For the total length, this would depend on the preference for the density of the LED's and anything from 100-250m could work for you in this case.

If you were to proceed with 100m (10 x 10m strings) this would total £319.91 ex vat and I will also include the unit pricing below.

Product	Price	Qty	Pre-Order?	Subtotal
10m Warm White Flash Bulb 80 LED Connectable String Lights on Black Rubber Cable SKU: MVD04WW Select product to associate	£30.00 ☐ Custom Price	10	No	£300.25
ConnectPro 2m Black Starter Cable - Powers up to 7000 LEDs SKU: MVD21B Select product to associate	£11.66 ☐ Custom Price	1	No	£11.66

Kind regards,

Adam

Description

Battery-Powered Street Vacuum Cleaner & Sidewalk Cleaning Equipment

The Vanguard Brute MV2000 is a next-generation street vacuum cleaner designed to transform how cities, facilities, and commercial zones manage outdoor and indoor waste. As one of the most advanced pieces of street cleaning equipment on the market, this battery-powered machine delivers high performance with eco-friendly credentials, redefining modern sidewalk cleaning equipment for municipalities, factories, and public spaces.

Precision-engineered in Switzerland, the Vanguard Brute offers powerful suction with a compact 750mm footprint, making it the ideal street vacuum cleaner for navigating tight urban environments. It effortlessly cleans everything from pavements and pedestrian zones to car parks and industrial sites, all without emissions, noise, or disruption.

Built for Demanding Environments

Engineered for all-day performance, the Brute's long-lasting 18-hour battery ensures it works as hard as your team. This rugged sidewalk cleaning equipment features:

- Advanced pedestrian safety with the APSA™ Pedestrian Safety System and ASDM™ Dust Management, guarding operators and the public from airborne particles.
- Optional HEPA 13 filtration for ultra-fine dust capture (99.95%), ideal for sensitive zones and hygiene-critical industries.
- A 240L onboard wheelie bin for contactless waste handling with no need to touch hazardous debris like glass or animal waste.
- Whisper-quiet operation, soundproofed for low-noise cleaning in noise-sensitive areas such as residential or retail zones.

Whether you're managing litter in parks, cleaning curbsides, or maintaining factory walkways, this street cleaning equipment is your all-in-one solution. It mounts kerbs up to 20cm, glides over uneven terrain with puncture-proof tyres, and pivots with a smooth 360-degree turning radius for superior agility.

Maximum Efficiency, Minimum Effort

With Bluetooth-controlled 3-speed suction and an automatic fire extinguishing system, the Vanguard Brute goes far beyond standard sidewalk cleaning equipment. Operators benefit from a built-in washer lance for targeted cleans and a lockbox to store personal belongings securely.

One Vanguard Brute can replace up to five manual operatives using traditional carts and brooms. This street vacuum cleaner is not just powerful, it is up to 200 percent more productive and reduces cleaning costs dramatically. Maintenance is minimal, with a life expectancy exceeding 10 years, making it a future-proof investment in sustainable street cleaning equipment.

Where It's Best Used

Ideal for use in urban cleaning zones, city councils, industrial estates, food production facilities, and large-scale commercial premises.

FAQs: Vanguard Brute MV2000 Street Vacuum Cleaner

What makes the Vanguard Brute MV2000 different from other street vacuum cleaners?

Unlike conventional machines, the Brute is fully electric, offers an 18-hour runtime, and integrates advanced safety and dust control systems, making it one of the most capable and sustainable street vacuum cleaners available.

Can the Brute MV2000 be used for sidewalk cleaning?

Yes, it is built for it. With a 750mm width and enhanced manoeuvrability, this sidewalk cleaning equipment is perfect for pavements, tight paths, and confined urban areas.

Is the machine suitable for both indoor and outdoor use?

Absolutely. It is engineered for versatility across both environments, from warehouse floors to city streets, providing effective **street cleaning equipment** across all terrains.

How does the Brute MV2000 handle rough or uneven surfaces?

The Brute comes with puncture-proof tyres and enhanced kerb-mounting capabilities, allowing it to easily tackle rugged outdoor conditions and uneven paving.

What kind of maintenance is required?

Thanks to its industrial-grade build and self-cleaning filtration system, the Brute requires minimal maintenance and offers a service life of over 10 years.

Is the Brute MV2000 noisy?

No, its whisper-quiet electric drive and noise-dampening design allow it to be used around residential areas, hospitals, and shopping centres without disturbance.

Can this street vacuum cleaner handle hazardous waste?

Yes, the system is designed with safety in mind. Its 240L onboard bin allows contact-free waste handling, reducing the risk of exposure to dangerous materials.

Choose the Vanguard Brute MV2000 for reliable, high-efficiency cleaning across streets, sidewalks, and industrial spaces. Trusted by professionals for durability and ease of use in the toughest environments.

7. Dog bags re-ordering

The last time we ordered doggy bags was back in April 2023 and received 108 cases of 2,500, so 270,000 bags.

Stocks are now low so below are some quotations to replace with the same, or an option to just buy non branded/non compostable ones.

Last time we ordered these, it was decided to go for the Compostable product as the one we had been buying was Oxo-degradable, so not fully compostable and, to have the whole order branded.

The plastic is compostable 20micron (80gauge) to EN13432 standard for compostable packaging.

Helping Euxton be cleaner and greener

**Bag it
Bin it**

This bag is a 100% biodegradable & compostable ECO WASTE BAG

The dispensers and bags are supplied by
Euxton Parish Council

Feedback to Euxton Council
 clerk@euxton-pc.gov.uk

Oxo-degradable versus Compostable

The key difference between **oxo-degradable** and **compostable** plastics lies in their expected behaviour at the end of their useful life. Oxo-degradable plastics are conventional petroleum-based plastics modified with an additive that promotes oxidation and fragmentation, leading to brittleness and fragmentation into smaller pieces. In contrast, compostable plastics are designed to disintegrate and biodegrade under specified composting conditions, ensuring they leave no toxic residue or visible plastic fragments when processed correctly.

Compostable plastics are tested and certified to adhere to international standards such as ASTM D6400 in the U.S. or EN 13432 in Europe, ensuring they disintegrate within 12 weeks and biodegrade at least 90% within 180 days in a municipal or industrial composting facility. These standards also ensure that the leftover compost is free of toxins, making it safe for gardening or agricultural applications.

When choosing between these two types of plastics, it is essential to consider the material's expected behaviour at the end of its useful life and the specific requirements of the composting system.

Eco Green Living

Quote for the Compostable branded bags, cases of 2,500 x 108 cases = 270,000 bags at £74.50 per case, less 10% plus delivery would be £7,248.

30% deposit before the bags go into production – full order delivered in on completion.

Option - We can accommodate a half pallet order. Please see the revised invoice reflecting the updated quantity:

2nd quote is for the same but only 80 cases = 200,000 bags

- 80 cases @ £74.50: £5,960.00

- Less 10% discount: -£596.00

- Shipping: £90.00

- Subtotal: £5,454.00

PB Group - Manufacturer of plastic bags

20micron (80gauge) to EN13432 standard

JRB Enterprises

Non branded/non compostable

The Standard bag is 22 micron thick and Oxo-degradable.

- Oxo-degradable
- Strong and durable
- Standard colour – green
- 800 bags per case (grouped in 50s)
- 22 micron thick
- One-bag-per-pull

1-9 cases £28.20 each/ 10+ cases £25.90 each

10 cases of 800 bags = £259.00

Weldbank Plastics

There is a minimum quantity of 1000kilos (1ton) of this material to be able to get it extruded.

I have quoted for the 27,000 bags but please note, this is price incorporating the cost of the 1000kilos of material.

If we were to make the 1000kilos into bags, we would get approx. 300,000 bags from this weight, so I have quoted for this also:

Qty	Spec	Price per bag	Price per 1000
27,000	195x320mm Green Compostable Bioplass bags Pbd 1cot/2sides Wicket perfs Blatch in 100's Box 2500 20mic	£0.432	£432.00
300,000	As above	£0.069	£69.00
	Plus origination/artwork	£150.00	£150.00
	Delivery: 4-5 weeks

ELECTRIC CITY CLEANING
PRODUCT GUIDE

VANGUARD BRUTE

THE ULTIMATE CLEAN & GREEN SOLUTION FOR LITTER, DETRITUS & WASTE COLLECTION

INTRODUCING THE VANGUARD BRUTE: AN ELECTRIC LITTER COLLECTION MACHINE READY TO REVOLUTIONISE INDOOR AND OUTDOOR WASTE MANAGEMENT

Historically, waste collection has been a dirty job - not with the Vanguard Brute. The Brute is a game-changer that's reshaping the landscape of electric pedestrian street cleaning. Leave behind the mess of the past and let the Vanguard Brute effortlessly tackle waste collection. It has been expertly engineered to handle any waste that can fit through a 125mm diameter tube, all while maintaining impeccable hygiene standards.

Smart, stylish, and built with precision, the Vanguard Brute is the superior version of its predecessor, with its new design being more sleek and robust with improved visibility. Perfectly sized at 750mm, being able to fit through a standard door, it effortlessly cleans streets, factories, and shopping centres. With its whisper-quiet electric drive and impressive 360-degree turning radius, operation is a breeze, making every cleaning task an absolute pleasure.

Crafted in Switzerland, the Vanguard Brute is a fusion of cutting-edge battery technology, computer-controlled motors, and an unyielding commitment to clean air principles.

It's not just a machine; it's a transformation in cleaning efficiency. Thanks to its ingenious self-cleaning filters, peak performance is maintained, skyrocketing productivity by up to a staggering 200%.

Experience the next level of cleanliness with the optional HEPA 14 air filters. Removing up to a remarkable 99.997% of dust particles, it's not just about tidiness; it's about safety and wellbeing. Equipped with automatic dust suppression, fire extinguishing capabilities, and a built-in pressure washer for those precision cleans, the Vanguard Brute takes operator safety and productivity to unprecedented heights.

The Vanguard Brute is where cleanliness meets innovation. Join the movement towards a sparkling future – one powered by the Vanguard Brute, leading the way in electric pedestrian street cleaning.

ONE VANGUARD MV2000 CARRIES OUT AS MUCH WORK AS FIVE CONVENTIONAL OPERATIVES USING A TWO-WHEELED WASTE CART AND BROOM

SAFETY

The Vanguard boasts completely new high levels of safety. The automatic self-cleaning filters and ASDM™ Safe Dust Management System maintain peak performance and ensure that both the operatives and passers-by are continuously protected from hazardous airborne dust, even during the process of emptying the bin. The new APSA™ Pedestrian Safety System ensures optimum safety for the public in the workplace.

All waste is deposited directly into the MV2000's on board 240L wheeled bin, which is easy to remove and empty, and also prevents any physical contact with the operator – a real benefit when dealing with broken glass, dog faeces, and other potentially hazardous material.

The automatic filter cleaning and optional HEPA 14 filtration protect both the operator and the public from otherwise inhaling potentially harmful dust. The efficient way the vacuum works reduces the level of dust that would typically escape during waste collection, making it a safe solution for pedestrian areas.

ECONOMIC

The MAXVAC Vanguard Brute is economical to run and requires low maintenance; the proven statistic is that it carries out as much work as five conventional operatives using a broom and a two-wheeled cart. The MV2000 offers the added benefits of a near silent operation and the highest levels of air filtration, making it suitable to use at any time or place, day or night and can operate where sweeping by hand is neither practical nor efficient.

THE MV2000 HAS RADICALLY TRANSFORMED THE WORK OF ROAD CLEANING TEAMS

THE MV2000 IS BATTERY-OPERATED WITH AN ELECTRIC MOTOR
SO IS WHISPER QUIET AND EMITS NO FUMES OR POLLUTION.

MODERN

The Vanguard Brute has radically transformed the waste management landscape. Many street cleaning teams have traded in their broom and two wheeled waste carts for a modern Vanguard. Featuring a huge amount of modern additions, it boasts simple steering, a lightweight carbon fibre wand, puncture-proof tyres, a time meter, safety lights and many more options.

The robust cover can even be customised to your corporate colours or something special such as an event or marketing campaign your company is running. Traditionally, street sweeping as an occupation has had low appeal; however, with the MV2000, we are helping to change this perception - Vanguard operators are respected, skilled workers equipped with the most useful, modern equipment.

GREEN

Having an eco-friendly unit does not mean you'll need to sacrifice performance, quality, or productivity. The Vanguard Brute's electric motor delivers plenty of power for powerful suction, giving an instant and effective clean with no noise pollution.

'Street sweepers have certainly come a long way from their 'turn of the last century' roots. It makes sense for us to invest in these sweepers as we like to keep the town centre as clean as possible for our visitors and businesses alike.' - Cabinet Member for a Clean and Green Environment.

WITH INTELLIGENT, COMPUTER-CONTROLLED TECHNOLOGY, THE BATTERY-POWERED MV2000 PROVIDES UP TO 18 HOURS OF INDEPENDENT OPERATION.

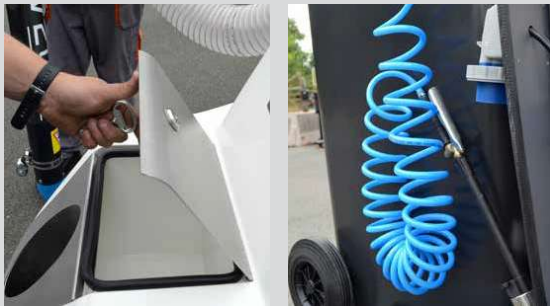

EFFICIENT

The fact that the Vanguard Brute is 100% battery powered with soundproofing for near-silent operation. This also means that it has no CO2 emissions to help you meet net zero targets.

The electronic traction motor provides effortless variable drive and braking, allowing you to safely mount and descend kerbs of up to 20cm with ease. The Vanguard's industrial quality tyres are equipped with an anti-puncture system, ensuring operation without interruption.

ERGONOMIC

The MV2000 is easy to handle, self-propelled, well-dimensioned and extremely simple to operate. The ambidextrous steering arm is equipped with an automatic safety system in the event of operator error. The ultra-light carbon suction pipe with its adjustable ergonomic armrest and roller support wheel on the underside of the pipe allows for easy, tireless operation.

THE VANGUARD BRUTE OFFERS A SIGNIFICANT UPGRADE IN COMPARISON TO STANDARD WASTE COLLECTION MACHINES.

INNOVATIVE

The Vanguard Brute has many innovative features that make it more advance and far superior to previous designs.

The Vanguard's evolution is a result of working closely with clients for more than 10 years and taking their feedback into account for future models.

The Brute's brand new, more robust design offers enhanced visibility and a lockbox for operators' personal belongings.

Previous upgrades have included ensuring that the Vanguard is fully compliant with airport specifications, adding on a water suppressant sprayer and an automatic fire extinguisher system for added safety, including self-cleaning filters for consistent cleaning, and including a pressure washer system for the removal of dirt and grime from walkways. We're always looking for ways to make the job of collecting unpleasant waste easier, quicker and safer.

BUILT TO LAST

Typical of Swiss manufacture, the build quality and engineering on the Vanguard Brute is of the highest standard for a long and efficient life cycle. These standards give customers the peace of mind that each Vanguard will continue to perform at the top of its range throughout ownership and provide an excellent return on investment.

THE VANGUARD BRUTE CAN BE USED BOTH INDOORS AND OUTDOORS, MAKING IT Hugely Versatile FOR A RANGE OF WASTE COLLECTION SCENARIOS.

VERSATILE

The majority of Vanguards are sold to councils and contractors to clean our streets. However, an increasing number of these machines are now being used within industrial and commercial settings. Health and safety regulations and cleaning efficiency have been the two main drivers of this growth. Alongside this, as the Vanguard Brute can be used both indoors and outdoors, there's no limit to the machine's capabilities for removing waste, making it incredibly versatile.

Airborne dust caused by more old fashioned, traditional methods of cleaning are simply not acceptable in many industrial settings. This is not only due to health and safety specifications, but dust can also be a contaminant that can seriously reduce the shelf life of many products. With a Vanguard Brute, these health risks are minimised and the job can be completed quickly and effectively.

Its compact design also allows for a thorough clean, as it's able to reach into small or awkward spaces to ensure all waste is removed.

AFTER SALES SERVICE

The Vanguard has an excellent reputation for reliability and performance and, if properly maintained, will give 10+ years of quality service. MAXVAC offer a fully comprehensive service for spare parts, maintenance and regular servicing.

OUR GUIDE TO BRANDING THE VANGUARD BRUTE

LIVERY BRANDING

The Vanguard has been carefully designed to ensure our clients have the opportunity to include personalised branding on their machine that will ensure great exposure and assure consistent quality.

With our expert design team, we will communicate and deliver proofs prior to production, make any changes required within your branding space and follow your brand guidelines.

PRINT

As part of the package, we will deliver your Vanguard fully branded up using our preferred printers. It couldn't be easier to customise your machine to your specific requirements.
